(57) Abstract :

The present invention relates to a smart wearable notification device, specifically designed for individuals with hearing and olfactory impairments. The system comprises a wearable wristband integrated with an OLED display, sensors, RF communication, and haptic feedback, capable of receiving alerts from various household safety and utility systems. The device ensures safety and awareness for individuals who cannot perceive auditory or smell-based cues by delivering clear visual and tactile alerts. It is particularly helpful for deaf individuals, elderly persons, and general users.
